

project: performing arts center

The Alaska Center for the Performing Arts, Anchorage, Ala.

Product: 2-1/2-inch standing seam panels

Material: 22-gauge stainless steel formed onsite with a Zimmerman Metals roll former

Component: Snobar snow retention, manufactured by Action Manufacture, Engelwood, Colo.; distributed by Riddell & Company, Engelwood, Colo. and SnoBlox-Snojax, Mechanicsburg, Pa.

Installer-General Contractor: Rain Pro Roofing, Anchorage, Ala.

Architect: Kumin Associates, Inc., Anchorage, Ala.

The architect wanted snow guards on this project ... and wanted an architectural feature. The architect wanted a unique design that highlighted the use of a snow guard to create a lattice look on the roof. Snobar is the only snow guard manufacturer that offers a complete stainless steel system. Snobar also was able to radius there tube to match the many different radii on the roof.

For more product information from **Zimmerman Metals**, see page 111; for **Snobar**, see page 94.
